

## **New & Updated Source of Vaccine Information**

### **Adolescent & Teen Vaccine Materials**

The Vaccine Education Center and Parents PACK have created materials to educate about the new vaccines and new recommendations for adolescents and teens. Materials include a laminated sheet for your office and bookmarks for your families. The laminated sheet includes information about necessary vaccines, ideas for informing parents, ways to comfort adolescents and teens, and a list of additional resources. A bookmark for parents and four for adolescents and teens, all available in both English and Spanish, offer information for these groups. The parent bookmark briefly describes the diseases the vaccines prevent and offers parents tips for before and after vaccines. The four bookmark designs for adolescents and teens center on interests of this age group and offer simple descriptions of what the vaccines prevent as well as ideas on how to be more comfortable getting the vaccines.
